iversified Industries.

Bafore manufactures were estaber dear, as compar ed to their present condition. It was not diversified crops only, but indultries as well, that wroughs the beneficial change. The Journal of Chemistry.] be southern city of Louis-In Nashville, Columbus, Atand other southern mills are growing, and yellow. those of Lowell and the east, will consume more at home nav are now duing it. The manifest inv of the south is not to be simply

up the richest and most beneficial varied in lustry and commerce in the You can hardly name a and black. southern state that is not full of coal and iron. We cannot have the best ming until we have the best manufacturing, each an indispensable help to the growth of the other. To the farmer it is increase of the product of his acros, economy of exchange and instant and constant call for a

variety of labor. And this is recent southern experience. No theory or assertion can outweigh the eloquent facts nor withstand the overwhelming evidence of experience.

# The Possibilities of Land Culture

A remarkable illustration of what may be done with 10 acres of land only has been furnished by a fruit Olive-Yello planter named Dillon, of Woodland. California. Six years age he planted five acres with Muscatel grapes, since which he has added two more nercy. He has also planted one acre with prunes, nectarines and peaches. From the live acres first mentioned dis gross returns last year were \$1200. Last year he planted three-fourths of an acre of beets, which yielded 35 tons. By the aid of these, and a of horses and two cows seven months, tance. Thus in mixing a limestone bia fending Dillon planted 2) walnut tint, white is the principal ingredient, and red the color of which the least men coagulated but not hardened;

You never knew a mean, stingy, shrivel souled man walk up to a discouraged or afflicted neighbor and tell lim to Thrace up." It is the bighearted, open souled fellow that comes when you are east down and squares off in front of you and tells you: "That would ould fellow; brace up." It is he that tells you a good story and makes you hough in spite of yourself, and that lifts the curtain that dark me your and, and tells you a fellow, March 7, 1885. He had to look and appears the light.

Stable Cleaning.

Forty to fifty years ago, and we are sorry to say that the evil still exists at the present time at points far away from towns and cities and dense populations, there was nothing so much neglected as the keeping of cow stables clean. As a common and the they were cleaned out once a dairy man who practices both system. One of our scientific exchanges relates a novel method for administering nourishment to invalids and persons with weak digestion, which, it is
alleged, has been practiced in Paris
with much success. with much success.

Diseases and enfeebled health commonly owe their origin to the imperfect assimilation of food. When the digestive functions are impaired the body is insufficiently nourished, and is unable to resist the encroachment of disease. For the maintenance of the milker, as simply because the pile of manure must be gotten out of the milker, as simply because the pile of manure must be gotten out of the manure must be gotten out of the most important supply of cold water or ice, the deep pail method cannot be used, and the shallow pane way to allow of the putting up and letting loose of the cattle morning supply of either, the deep pails are economical of space and in every way less trouble than the pans. The most important consideration in setting the putting up and letting loose of the cattle morning and evening. We have seen the manure in the cattle stalls two feet deed of almost elear dung, with the kinder most important consideration in sethealth and for restoration from sickness, it is of the first importance that the food be not only of the most neurishing kind, but that it be administered in a form easy of digestion and assimilation.

This depends upon managestiled principle of hydrostatics, which is, that one fluid that is lighter than another will rise to, and float upon its surface.

Cream that is lighter than another will rise to, and float upon its surface. day to day received layer upon layer Cream that is lighter than milk, and In a paper recently communicated until it was one disgusting mass, and according to the rule of gravity, the to the Medical Hospital Association, was left there until it became dry and former will rise through and float being burned. It is then reduced to impalpable powder, by pounding in a mortar and passing through a fine sieve. The powder so obtained representational four times its weight in the winnowings of the threshed grain, oats, straw, etc. They were of course fight. The fibre and the large per sentations of the large per sentations of the large per sentations of the large per sentations. fiesh. The fibre and the large per centage of water contained in the fiesh are thus removed and the essential what would have been obtained from have practiced their deep pail and

Arizona were bought by the United States Government in Asia Minor. Spider Life Wonders. There were seventy-six camels in the first "colony." They were first employed in packing between fort Tejon others among its editors.

That's a common expression and has a world of meaning. How much suffering is summed up in it.

The singular thing about it is, that pain in the back is occasioned by so many things. May be caused by kidney disease, liver complaint, consumption, cold, rheumatism, dyspepsia, overwork, nervous debility, &c.

Whatever the cause, don't neglect it. Something is wrong and needs prompt attention. No medicine has yet been discovered that will so quickly and surely cure such diseases as Brown's Iron Bitters, and it does this by commencing at the foundation, and making the blood pure and rich.

Wm. P. Marshall, of Logans-port, Indiana, writes: "My wife has for many years been troubled from pain in her back and general debility incident to her sex. She has taken one bottle of Brown's Iron Bitters, and I can truthfully say that she has been so much benefited that she pronounces it the only remedy of many medicines she has tried."

Leading physicians and clergymen use and recommend Brown's Iron Bit-TERS. It has cured others suffering as you are, and it will cure you.

mant virus with nostetter's Stomach Bitters. Protect the system against it with
this beneficent anti-spasmodic, which is
futhermore a supreme remedy for liver
complaint, constitution, dyspepsia, debiliity, rheumatism, kidney troubles and
other aliments.
